## EDUCATION

---

|                                                                                |             |
|--------------------------------------------------------------------------------|-------------|
| <b>Vellore Institute of Technology, Vellore</b>                                | 2021-2025   |
| Bachelor of Technology in Computer Science Engineering ( <b>9.13/10 CGPA</b> ) |             |
| <b>Class XII</b> , Alphores Junior College ( <b>988/1000</b> )                 | 2019 - 2021 |
| <b>Class X</b> , Brilliant Model School ( <b>10/10 CGPA</b> )                  | 2007-2019   |

## SKILLS

---

|                            |                                                                                      |
|----------------------------|--------------------------------------------------------------------------------------|
| <b>Languages:</b>          | C++, Java, Python                                                                    |
| <b>Frontend:</b>           | HTML, CSS, JavaScript, React                                                         |
| <b>Backend:</b>            | Node.js, Spring Boot, REST APIs                                                      |
| <b>Databases:</b>          | MySQL, PostgreSQL, MongoDB                                                           |
| <b>Cloud &amp; DevOps:</b> | AWS, Docker, Terraform                                                               |
| <b>Tools:</b>              | Git, GitHub, Postman                                                                 |
| <b>Concepts:</b>           | Data Structures, Algorithms, OOP, System Design, Distributed Systems, OS, Networking |

## EXPERIENCE

---

|                                  |                     |
|----------------------------------|---------------------|
| <b>Enphase Energy</b>            | Sept 2025 – Present |
| Engineer 1, Security Engineering | Onsite              |

- Designed and developed a secure **RBAC-based YubiKey management portal** for certificate lifecycle management; extended to an **MTT YubiKey website** for MTT machines, earning a **Productivity Through Innovation Award**.
- Built and deployed **CSLNX infrastructure for IQGW1 and IQGW3** across all environments with **auto-scaling**, improving system availability and operational efficiency.
- Automated **AWS infrastructure provisioning** using **Terraform**, improving deployment efficiency and scalability across environments.
- Integrated **Armis** with multiple **AWS accounts** and developed **dashboards** for enhanced asset visibility and security posture monitoring.
- Deployed and managed **Grafana** and **IRIS** infrastructures across **pre-prod and production**, enabling observability and faster incident response.
- Conducted **phishing simulations** and implemented targeted awareness training, strengthening organizational security posture.
- Enhanced email security using **Proofpoint** and **Microsoft Defender**, reducing phishing and spam exposure.
- Monitored and analyzed security events using **CrowdStrike Falcon**, **XDR**, **Cloudanix**, improving threat detection and response.
- Evaluated APIs against **OWASP API Security Top 10** using **Cequence**, identifying vulnerabilities and improving runtime protection.

|                             |                     |
|-----------------------------|---------------------|
| <b>HP Inc.</b>              | Jan 2025 – Jul 2025 |
| Software Engineering Intern | Bangalore           |

- Designed and implemented an **automated updater system** for distributed agents, reducing manual intervention by **90%**.
- Developed backend services using **Spring Boot** and integrated with **AWS** for scalable distributed applications.

- Built cross-platform components using **C#**, **Electron.js**, **Node-RED**.
- Collaborated in Agile teams, contributing to sprint planning and delivery of production features.

**Ethnus Consultancy Services**  
Software Engineering Intern

Aug 2023 - Nov 2023  
Remote

- Built responsive and accessible web interfaces using **HTML**, **CSS**, **JavaScript**.
- Gained hands-on experience in frontend development and version control using **Git**.

## PROJECTS

---

**CPU Scheduler:** Simulated **FCFS**, **SJF**, **SRTF**, **Round Robin** algorithms. Analyzed performance metrics like turnaround and waiting time. Improved learning efficiency by **50%**. ([Link](#))

**BIGINT Library:** Developed a **C++ arbitrary precision arithmetic library** supporting addition, subtraction, multiplication, division, and modular operations. Optimized for performance and accuracy. ([Link](#))

## ACHIEVEMENTS

---

- Ranked **597** among **20,000+** students on GeeksforGeeks Practice Portal.
- Solved **500+** Data Structures and Algorithms problems on LeetCode.
- Core member of Mozilla Firefox Club; conducted sessions for **200+** students.
