EDUCATION

Vellore Institute of Technology

BTech in Computer Science and Engineering(CGPA: 7.28)

Vellore, Tamil Nadu

Sept 2021 – July 2025

SKILLS

Languages : Python, SQL.

AI & ML : Regression, Classification, Clustering, NLP, Deep Learning, Gen AI.

Frameworks & Tools : TensorFlow, Keras, Scikit-learn, OpenCV.

Data & Visualization : Pandas, NumPy, Matplotlib, Seaborn, Power BI, Tableau.

Other : Git/GitHub, Jupyter Notebook, Google colab, vs code, REST APIs.

EXPERIENCE

PraNaga Private Limited

March 2026 – Present

AI/ML Intern

Hybrid

- Worked on AI-powered cybersecurity solutions by exploring the integration of AI/ML models with the Wazuh security monitoring platform.
- Assisted in deploying and configuring security monitoring environments using Docker and Kali Linux for testing and development.
- Researched and implemented security automation concepts, including log analysis, threat detection, and incident monitoring workflows.
- Collaborated with the cybersecurity team to troubleshoot deployment issues, validate security configurations, and document implementation progress.

PROJECTS

Portuguese Bank Marketing Project

- Developed a classification model to predict customer subscription to term deposits.
- Performed exploratory data analysis (EDA) and data preprocessing on demographic, financial, and campaign data.
- Handled categorical variables and class imbalance to improve prediction performance.
- Achieved 91% accuracy using the Random Forest classifier.

FIFA 20 Player Analysis

- Analyzed FIFA 20 player statistics to identify performance trends and key attributes.
- Performed data cleaning, preprocessing, and feature selection on player performance data.
- Built a player comparison system based on multiple performance attributes.
- Achieved 89% accuracy using a player attribute-based classification model.

Credit Card Fraud Detection

- Developed a fraud detection system using Machine Learning and Deep Learning models, including Logistic Regression, Random Forest, ANN, and LSTM.
- Preprocessed highly imbalanced transaction data and performed feature engineering to improve detection accuracy.
- Evaluated models using Precision, Recall, F1-Score, and ROC-AUC, focusing on minimizing false negatives.
- Achieved 94% accuracy using an ensemble of machine learning and deep learning models.

CERTIFICATIONS

Artificial Intelligence Expert * View Certificate — IABAC

Mar 2026

Artificial Intelligence Engineer (AIE) * View Certificate — NASSCOM

Mar 2026

Data Science Foundation * View Certificate — IABAC

Mar 2026
